

Glass Specification Guidelines

Please complete this form to help process your specification and order as efficiently as possible. Some information may not be applicable for your particular order.

Send completed form to orders@skydesign.com

Lead Times

Many factors determine lead times: project square footage, special glass fabrication (holes, miters, pattern cuts, etc.), multiple finishes on glass, and custom designs. To ensure we meet your deadline, please contact a Skyline Design Representative for general lead time information early in your project schedule. Lead times are determined on an individual project basis.

General	
Project Name	
Designer / Architect	City, State
Skyline Design Quote Number	
Install Date	
Pattern Specific	
Pattern Name & Option Letter	
Sample Number	
Pattern Direction (provide sketch)	
Does pattern cover full or partial height? (If partial he	alabt avaiida akatab 9 dimagainga
Is pattern continuation and/or alignment required?	(If yes, provide sketch)
Which side of glass will be patterned? (Face, Back, o	or Both)
Custom Artwork: Specify size & positioning if application	zable

Glass Specification Guidelines

Magnetic or Non-Magnetic Does the installation require a Formed Backer with Z-clip? Will the glass be used as a writable surface? Number of magnets needed (Available in White or Black. Recommended 4 magnets per 16 sq. ft.) Glass Specific Glass Thickness Glass Type & Color Glass Sizes & Quantities (List width x height of exact cut glass sizes - needed for pattern direction & markerboard orientation)	Vitracolor® (Back-painted) Specific		
Magnetic or Non-Magnetic Does the installation require a Formed Backer with Z-clip? Will the glass be used as a writable surface? Number of magnets needed (Available in White or Black. Recommended 4 magnets per 16 sq. ft.) Glass Specific Glass Type & Color Glass Sizes & Quantities (List width x height of exact cut glass sizes - needed for pattern direction & markerboard orientation) Type of Edgework Special Fabrication: Holes, Notches, etc. (Provide sketch & dimensions. Glass must meet ASTM standards.)
