

Artwork Requirements

Skyline Design can fabricate glass with custom patterns or imagery that you provide.

Follow the guide below to ensure your files are prepared correctly. For any questions, please contact your Skyline representative or email sales@skyline.glass.

Vector

File Format

AI, EPS, PDF, CDR, DWG/DXF

Color Mode

For best results, supply file in the original color mode in which it was created. Our in-house graphics team will handle any necessary color space conversions.

Size/Scale

Create your file at or in proportion to the actual size. If not, we will scale it for you and provide a shop drawing to approve size and placement.

Text

Convert all text to outlines.

Swatches

Remove unused colors and ensure all used colors are included for accuracy.

Preferred Layer Structure

GLASS: Include any pertinent dimensions

Side 1 Art: Artwork on side 1 of the glass, if applicable

Side 2 Art: Artwork on side 2 of the glass, if applicable

Additional layers as needed

Raster

File Format

TIFF, JPEG, PNG

Color Space

For best results, supply file in the original color mode in which it was created. Our in-house graphics team will handle any necessary color space conversions.

Resolution/File Size

Provide all raster images (photos, artwork, etc.) at the highest possible resolution.

Do not upscale imagery. We use specialized software and techniques to upscale with maximum accuracy.

Layered Files

If you have edited your files for color or other adjustments, please provide both the layered and flattened versions to help address any issues.
