

End-User Glass Cleaning Guidelines

To maintain all Skyline Design products, gently clean, do not scrub, with a clean, soft, lint-free cloth and 4:1 mixture of water and distilled white vinegar.

A non-abrasive cleaner and a gentle cleaning method should be used. We recommend a soft, lint-free cloth be used and that the entire surface of the panel is cleaned in a circular motion for consistency.

Additional Cleaning Guidelines

Eco-etch

Small scale Eco-Etch patterns can be safely cleaned with more potent cleaners such as bleach as long as a few guidelines are followed. Cleaner should be residue free. Dyes or colorations in these solutions as well as chemical heavy solutions that leave a dry film will require panels to be rinsed with clean water.

Vitracolor Back-Painted Glass

Surface one of Vitracolor back-painted glass can be safely cleaned with a 70% isopropyl alcohol solution.

Laminated Glass / Ceramic Frit

Laminated and ceramic frit surfaces can be safely cleaned with a 70% isopropyl alcohol solution on both sides of the glass.
