

# SDX Smart Glass Suite At A Glance

SKYLINE

Smart glass controls light transmission by altering the opacity of the glass with electrical input. Skyline offers a suite of smart glass products:

## SDX™

**Retrofit adhesive smart film installed to glass in the field.**

Transform existing architectural glass into smart glass.

## SDX2™

**Smart film laminated between two panes of glass.**

Highest quality and lowest haze in the market.

## SDX3™

**Film-free smart layer laminated between two panes of glass.**

Film-free and haze-free—the first and only of its kind. Available as a turnkey framed healthcare viewing window.

All SDX products manufactured in the Midwest, USA

Priced 15% lower than competitive products

Combine with various fire, smoke and x-ray glass assemblies

Customize designs utilizing in-house decorative glass techniques

Patented control hardware allows for 24/7 operation

Tested up to 18 million switches

**Contact Skyline to find out which product is best for your project!**
