Designer

Henry Domke is an artist and former family physician who creates nature art for hospitals and clinics. Although many of his images come from the nature garden that is his “backyard” in Missouri, he also finds inspiration across the country. His greatest satisfaction is adding a healing tone for patients, staff and visitors in healthcare settings large and small throughout the country. His work can be seen on glass, canvas, paper and other media.

Glass Sizes

Up to 72” x 144” depending on glass type and technique
